We open now in St.Petersburg the position:

Internship: Junior Flash - Flex Programmer / Web Developer

Стажировка: Младший разработчик Flash – Flex приложений / Разработчик веб приложений

Job Description:

The successful candidate will take an active role in the design, development and delivery processes for the Projects RADAR solution. Projects RADAR is a compact software solution for target group oriented and flexible project status reporting.
Details about the Projects RADAR on the product web site:

- In Russian: www.projects-radar.ru
- In English and German: www.projects-radar.com

The software is being developed as a core product and customer individual solution. The customized solution fully supports customer individual business, requirements and needs. Candidate should have knowledge and understanding of service oriented software development life cycle, software design, development, testing, configuration management, delivery to customer side and follow up support. The solution is being developed with the following technologies: Flash / Flex, XML, Web, HTML, Win, Mac, iOS.

Responsibilities:

- Full cycle of the software development. Participating in the projects of Projects RADAR solution design, development, introduction to the new customers, follow up projects (new features, expansion, migration, integration with other customer IT systems) and support:
  - Understanding of the functional requirements and specifications (documentation in English, German will be a plus);
  - Planning, estimating and reporting development activities and progress;
  - Designing and working out a solution together with development team;
  - Developing a Flash / Flex solution according to the specification (Adobe Flash Builder, Adobe Flash Professional);
  - Participating in code reviews;
  - Working with tasks, issues and bug tracking system (Atlassian JIRA);
  - Working with source control system (Rational ClearCase);
  - Hand over the solution to QA and support teams.
- Working in the international team of product consultants (Germany) and product development, testing and support (St. Petersburg);
- Assists management with the technical evaluation of issues, including alternatives, risk assessments, and recommendations.

Skills Required:

- Knowledge of at least one ECMAScript-based language, preferably Actionscript

- Working experience half year+, showing portfolio with Flash and / or Flex and Javascript projects and collection of own code samples at GitHub or similar repository will be a plus;
- Participation in developing UI-oriented applications using Flash/Flex, Javascript or HTML5 technologies;
- XML technology understanding will be a plus;
- Experience in developing web-applications and understanding OOP will be a plus;
- User-level Mac and iOS experience to support different product versions will be a plus;
- Good English knowledge, written and oral communication (German welcome);
- Good teamwork and communication skills;
- Strong attention to details and we expect the high level of responsibility.

Expectations:
- Thinking and behaving customer-oriented;
- Providing self-direction in response to changes in requirements and specifications;
- Follow the development and project-specific standards and processes;
- Having ability to adapt to the changing scope and conditions of a project.

Besides that, you have strong communication and interpersonal skills and like to work in a team. You think customer/solution oriented and focus on the related services. You are motivated and appreciate new challenges. Good conception skills round-off your profile. Within the scope of your activities you will have very good possibilities to improve yourself in relation to state of the art technologies and will work in complex business-projects.

Work conditions:
- Salary rates will depend on the interview result;
- International and friendly team;
- Full employment according to Russian Labor Law;
- Well equipped working space in modern business-center with good infrastructure;
- Social package (medical insurance, lunch money, education, etc.).

Your job will be very interesting with really good perspectives!
