GET IT is an internationally working Consulting and Technology company with locations in Germany, Switzerland and Austria as well as in St. Petersburg. Our customers are both well-known global concerns such as VW, GDF Suez, Bilfinger Berger, Bayer, Mercedes, SAP and non-profit organizations like UNIDO.

In cooperation with our clients we realize challenging projects in coordination with business, organizational development and IT.

GET IT Career: Software Development St. Petersburg

The ones, who are working successfully, can achieve a lot at GET IT. We are looking for people who are willing to break new grounds with us!

We open now in St.Petersburg the position:

Student: Web Programmer / Business Application Developer/ Software Engineer

Студент: Веб программист / Разработчик бизнес приложений / Инженер - программист

Job Description:

You would like to finish your studies with a practical diploma thesis and thereby improve your profile? You are working on your diploma thesis or dissertation now or are planning to do this soon and want to integrate more practical content? Do you already have a topic that you want to discuss with us?

We would like to give you the possibility to work out your diploma thesis with our help and to support our company with your solutions. Benefit from our experience and practical knowledge. Of course, you can count on an optimal supervision by our specialists to achieve the best possible result.

Skills Required:

You bring following qualifications with you:
- • Knowledge of web-based applications development principles;
- • HTML5/CSS3 skills;
- • JavaScript and jQuery skills;
- • LESS/SCSS experience;
- • Knowledge of OOCSS/BEM principles will be a plus;
- • NPM and Gulp experience will be a plus;
- • Basic knowledge of SQL;
- • Knowledge of ColdFusion/CFML, MS SQL and knowledge of development processes will be a plus;
- • English language.

In order to assess your HTML/CSS skills properly we request for your operable portfolio projects. Please provide some valuable links in your cover letter including a short description of the work accomplished in each project.

Responsibilities:

As intern you will be fully integrated into our team and you can work self dependently. You will be able to deploy and develop your knowledge and abilities in challenging projects. We will attend you best possible and give you extensive free space for autonomous work – perhaps with you we get to know our next promising employee!

You will be mostly involved in front-end development processes, where you will be responsible for some of these typical tasks:
- Layout construction for HTML5 applications
- Layout migration [HTML4 -> HTML5] for our currently running solutions
- SCSS UI library development
- JQuery plugins integration
- Page performance tuning and network impact optimization

Expectations:
- Thinking and behaving customer-oriented;
- Performing duties with little supervision;
